

Gelcoat Micro Cut

Micro polishing compound for gelcoats and boat paints

Machine polish for lightly weathered and matt gelcoats and boat paints for the permanent removal of polishing haze, holograms and fine scratches. Holograms and fine scratches are mechanically eliminated. High yield, easy to polish and easy to wipe off. The ideal preparation for subsequent sealing.

Areas of use

For the permanent removal of polishing haze, holograms, fine scratches on gelcoats and boat paints

Recommendations for use

Can be applied using an eccentric polishing machine. Spread 5 pea-sized drops on a suitable polishing pad (Micro Cut Pad hard) and work in a crosswise motion. Spread the product on the surface at low speed and then process at the highest speed. Buff out the polish and remove any remaining polish with a Polish & Sealing Towel. Subsequent sealing is necessary. We recommend sealing after polishing with Gelcoat Finish, Marine Protective Sealant or Ceramic Boat Hull to close the pores of the surface.
